

Independent RQ2 Human Audit — Package Addendum

Audience: external independent auditor

Relation: companion note to the auditor protocol excerpt

What this package is

A distribution-ready, blinded annotation kit for one independent human reviewer.

What this package is not

- Not a complete research replication archive
- Not a source of prior audit decisions
- Not a summary of study headlines

Versioning note

This auditor kit is derived from a frozen observational export set. Your labels will be treated as an independent validation stream and will not silently overwrite any prior classifications.

Practical checklist

1. Read `README_FIRST.md` and `AUDIT_INSTRUCTIONS.md`.
2. Read `rq2_audit_codebook.md` once.
3. Complete all 121 rows.
4. Return `rq2_second_auditor_labels.csv`.
